---

Hello, Mr. Goydish,

Because of concerns expressed to the MITRE TL-Root by a diverse set of CVE Program community members, record publication for CVE-2026-25251 will not move forward at this time. We will notify you if record publication occurs at a later date. We wish to further inform you that the MITRE TL-Root has proceeded to Dispute Reconsideration step 3b, which can be found in the

<https://www.cve.org/Resources/General/Policies/CVE-Record-Dispute-Policy.pdf>

document. In addition, we will point out that, within any discussion forums set up for the CVE Program's CNA community, it is the practice of the MITRE TL-Root to decline interaction with individuals who are not CNAs. We can accept new requests on the <https://cveform.mitre.org> website.

Sincerely,  
MITRE TL-Root
